MATHEMATICS

ICC Mathematics Classes

ICC Mathematics is not designed to follow any school curricula, but it will prepare them for their GCSEs. Regular sessions over time will equip your child with all the tools they need to excel academically in mathematics. The tutoring will not follow a school curriculum, but rather complement their maths GCSE. These independent learning skills enhance the students' performance right across the school curriculum. **ICC Mathematics** is a tutoring programme with each student receiving regular support from the tutor, videos and worksheets. The carefully developed worksheets allow students to practice questions throughout the week, whilst their Instructor offers guidance when necessary.

Students can start **ICC Mathematics** from year 9 to Year 11. **ICC Mathematics** helps children of any ability. The sooner children begin, the earlier they can start developing skills to gain the greatest cumulative benefit; as soon as you feel your family is ready to make the commitment to long-term study, **ICC Mathematics** will be ready to help you achieve your goal.

Homework is set for students because completing an appropriate amount of work on a regular basis is simply more effective than longer study sessions with extended breaks – they will learn more efficiently and make faster progress as they apply what they have learned in sessions throughout the week. This routine also encourages effective study habits and a positive attitude to study. This will mean students will receive homework to support learning within sessions.

The tutoring will be based on student test scores which will determine their current ability and not on their age or school performance, although we believe that every child has unlimited potential and can ultimately tackle advanced work through well-paced sessions. We will have children of different ages studying different material dependent on student need. Classes will be designed according to ability and test results. Students will initially take an entrance exam and be placed in 1 out of 4 classes. The class will focus on particular levels of mathematics throughout the year. Students will be tested termly and have an end of year assessment which will determine their new class for the following academic year. (Please note their attendance, attitude towards learning and homework completion will also play a factor when determining their class change).

Weekly tutoring sessions will last 2 hours, students will be required to complete all homework set by the teacher and to watch videos for further assistance at home. This will all depend on the tutoring scheme of work and class ability. You can keep track of students' progress by speaking to the tutor and keeping track of the termly exam results. This will be a good indicator if a student is working hard and reaching a key milestone.

The fee will be £490 which will cover each 2-hour session throughout the term as timetabled below. Payment will be taken at the start of every term for a block booking for the entire term. If the teacher is unable to make a Saturday you will be given the Sunday for the sessions, if the teacher is unable to commit to a Sunday you will not be charged for the session. To book your place on the course you are required to pay by the timeline below. At the start of each term, you will receive the scheme of work your child will be following which will enable you to keep track and support your child further. Please note we are unable to refund any sessions missed due to illness/holidays etc.

During the session the child will have access to a computer which will allow them to access online material. Worksheets will be printed and have access to mark schemes. At the end of the session, the tutor will have 5-10 minutes to address any questions you may have. The sessions will be 2 hours with a 10-minute break for prayer dependent on the timing of the session and mosque prayer times.

The sessions will be held by an experienced and qualified mathematics teacher. The teacher has taken various roles within his career such as leading a department, establishing best mathematics results within schools and being a consultant in mathematics. Qualified as a teacher at University College London ranked number 1 in the world and studied mathematics at a Russell Group university.

The sessions will run throughout the year with the exceptions of 2 sessions off in December, 2 sessions off in April and 6 sessions off in July and August. Due to the high demand, it will be first come first served. Your position will only be confirmed once full payment is made for the term. Limited spaces available, approximately 40. Once all positions are filled you will join a waiting list. Timings of the sessions will be between 10am to 7pm depending on which class you are placed within.

Payments can be made via cash in the office and through bank transfer using details below. Ensure you remember to pay separately for each child and to include the child's name on the reference section:

Enter PAYMENT DETAILS HERE

Term 1 payment must be completed by 7th September 2024 to confirm your place.

Currently the classes are for **BOYS ONLY**.

As a result of the tutor guidance, I not only achieved a Grade 5 in my GCSE maths but surpassed my own goals. Their personalised approach to teaching, tailored to my individual learning style, made all the difference. I now approach mathematical challenges with a sense of excitement rather than dread, thanks to the solid foundation my tutor helped me build!

Mehtab

I cannot express enough gratitude for the incredible journey I've had. I was barely getting by with a Grade 1 when I initially started working with him, having trouble understanding even the most fundamental principles. But because of his commitment, patience, and knowledge, I saw a change that was beyond anything I could have imagined and passing my GCSEs! Thank you sir!

Samir

In addition to teaching me math, my tutor gave me another boost of confidence and enthusiasm for the subject. He made sure I grasped the foundations before moving on by breaking down difficult subjects into manageable sections. His resolute assistance and inspiration inspired me to challenge myself beyond my greatest expectations. Amazing teacher!

Mohammad

I strongly recommend anyone looking to better their mathematics skills to reach out to my maths tutor. They have an incredibly inspiring dedication to their students success, and I will always be appreciative of the positive influence they have had on my academic career. Anything is achievable with his direction.

Abdullah

Deadlines

Registration – 05th October 2024

Term 1 payment – 12th October 2024

Entry Exam – 12th October, Time - TBC

Results – 19th October 2024 via email.

Term 2 assessment & payment – 21st December 2024

Term 3 assessment & payment - 14th April 2025

Final assessment 26th July 2025

Results 2nd August 2025 via email.

*Term Assessment & Payment deadline for following term.
